

Eligibility for Certification Education and Experience Requirements

Table 3 - Minimum education and additional experience requirements for each Level for candidates with existing certification in the same application sector wishing to apply for a higher Level.

Current Level	Target Level	Education	Minimum Additional Experience (Years)
1	2	All Levels of education	1
1	3	Relevant engineering or scientific discipline degree (BSc, BEng or equivalent) and specialized education in the corrosion field (significant corrosion content at BSc or BEng Level or significant post graduate corrosion study or research)	2
		Technical education	3
		Other education (requires basic mathematical skills)	4
2	3	Relevant engineering or scientific discipline degree (BSc, BEng or equivalent) and specialized education in the corrosion field (significant corrosion content at BSc or BEng Level or significant post graduate corrosion study or research)	1
		Technical education	2
		Other education (requires basic mathematical skills)	3
2	4	Relevant engineering or scientific discipline degree (BSc, BEng or equivalent) and specialized education in the corrosion field (significant corrosion content at BSc or BEng Level or significant post graduate corrosion study or research)	4
		Technical education	7
		Other education (requires basic mathematical skills)	11
3	4	Relevant engineering or scientific discipline degree (BSc, BEng or equivalent) and specialized education in the corrosion field (significant corrosion content at BSc or BEng Level or significant post graduate corrosion study or research)	3
		Technical education	5
		Other education (requires basic mathematical skills)	8
